PRESENTATION PR3P

• • •

~pikantné~

Newsflash

- Mark Zuckerberg's testimony before the US House (link)
- A Python interpreter written in Python (link)
- Don't give away historic details about yourself (link)
- T-Mobile Austria stores passwords in cleartext (link)
- Travis CI accidentally dropped production tables (link)

- FreedomBox (link)

What should you talk about?

- Motivation — why did you build what you built?
- Explanation — what did you build?
- Demo (if applicable) — how does it work?
- Conclusion — what did you learn? What did you do well and what can you improve?
- Q&A

Requirements

- Some kind of visual aid, not necessarily a slideshow
- Must engage your peers
- Must be about your project
